

METHOD AND SYSTEM FOR SURFACE PRODUCTION OF
GAS FROM A SUBTERRANEAN ZONE

ABSTRACT OF THE DISCLOSURE

40003917-110101
5 A method and system for surface production of gas
from a subterranean zone includes forming a drainage
pattern in a subsurface zone. The drainage pattern
includes a plurality of cooperating bores and has a
coverage area extending between the cooperating bores.
Water pressure is lowered throughout the coverage area of
the subsurface zone without significant subsurface
drainage by producing water through the cooperating bores
10 of the drainage pattern to the surface. Gas is produced
from the coverage area of the subsurface zone with at
least some of the water.
